

## Dale & Nancy Hartzfeld

For as long as I can remember, I have always owned a “fun” car. I purchased my first Corvette in 2004 a few years after I retired. The car was found In Auto Swapper and purchased sight unseen from a private party near Chicago. After many phone calls, we finally agreed on a price and it we shipped to my home in Saginaw. This was a 1998 pewter metallic/black coupe with 15,800 miles. It featured a 345 HP engine with a 6-speed manual transmission. This Vette lasted me until 2006 (decided it was time this GM retiree got a red GT Mustang) when I sold it sight unseen to a person living in British Columbia.

In 2012 having recently sold my then current “fun” car (Saturn Sky Redline convertible) it was time for another Vette. This time I found a Arctic white/tan 300 HP 4-speed automatic sitting on the used car lot at Somerset Buick/GMC. It was a relatively low mileage car in excellent condition, so I purchased it. Again, after a couple of summers it was time for something else (2013 Camaro 2SS convertible)

My third and current Corvette was purchased from McDonald Cadillac in Saginaw (traded in the SS Camaro). This Vette is a 2008 430HP 3LT velocity yellow/black convertible. It's equipped with a 6-speed automatic, magnetic ride control and polished aluminum wheels.

As you may have noticed that time has come (please tell Nancy). So my next Vette.....
